Fullstack software engineer with 7+ years of experience building performant, user-facing web applications with a focus on web development. Passionate about visuals and the merging of technology and art.

EXPERIENCE

Senior Software Engineer

Deloitte - January 2024 - Present

- * Led a team of three engineers to deliver an alpha full-stack utility work-tracking application using NextJS, React, and Prisma, shaping product scope and architecture from initial concept through early prototype.
- * Designed and implemented an Elasticsearch-backed search service to query millions of investment firm user records, improving response times; built the Angular interface to surface results.
- * Led engineers to implement web-based animations for an interactive exhibit at the 2024 Paris Olympics using React and Framer Motion, collaborating closely with designers to meet strict performance and UX requirements
- * Created a proof-of-concept application with a major pharmaceutical company using NextJS and React that allowed users to connect GenAI models to research new molecules and explore potential use cases.

Software Engineer

Giant Machines (acquired by Deloitte) - May 2021 - January 2024

- * Built a data visualization tool for a major car manufacturer using React, GraphQL, Serverless, and AWS that enabled stakeholders to monitor electric vehicle efficiency and make data-driven decisions.
- * Built a React Native and React mobile app backed by Express for a major utility company that digitized field-worker tasks previously managed on paper, reducing manual processes and enabling real-time data capture.
- * Developed a Google Chrome extension for a large clinical trials company using React, integrating with existing systems to streamline access to critical workflows in the browser.
- * Provided technical guidance and mentorship to newer engineers, offering code reviews and coaching to strengthen both technical and communication skills.

Software Engineer

AstreaX - May 2017 - June 2019

- * Developed frontend applications and backend RESTful API services using Typescript, Angular, HTML/CSS, and C#/.NET to support smooth user experiences across multiple products.
- * Partnered with the Arizona Department of Transportation to rebuild a decade-old application from the ground up, improving accessibility and performance for government users.
- * Collaborated on an internal employee time-logging system that integrated project and time data from Azure DevOps into a single, readable timesheet, simplifying reporting for staff.
- * Wrote and modified SQL scripts to create and update database structures and data in support of evolving product requirements.
- * Implemented detailed unit tests across projects to improve reliability and reduce regressions during feature development.

English Teacher

Seoul Metropolitan Office of Education - August 2019 - August 2020

- * Planned and taught lessons collaboratively with a Korean co-teacher, adapting content to meet student needs in a cross-cultural environment.
- * Communicated daily in both Korean and English with coworkers and students, building strong relationships and resolving classroom issues across language and cultural barriers.

SKILLS

Languages: Typescript/Javascript, HTML/CSS, Java, C#, SQL

Technologies: React, React Native, Angular, Node, NextJS, Express, .NET Core, Prisma, GraphQL, Postgres, AWS, Serverless, Azure DevOps

EDUCATION

University of Arizona

Bachelor's in Computer Science

Minor in Illustration
