SUMMARY

Fullstack software engineer with 7+ years of experience building performant, user-facing web applications with a focus in web development. Passionate about getting the visuals and UX right!

SKILLS

Frontend: JavaScript/TypeScript, Next.js, React, React Native, Angular, HTML, CSS

Backend: Node, Express, Java, C#, .NET Core, REST APIs, GraphQL, Prisma, SQL

Tools & Platforms: AWS, Serverless, Azure DevOps, Chrome Extensions, Git, Unit Testing

EXPERIENCE

Senior Software Engineer

Deloitte

January 2024 - Present, New York, NY

- Led a team of three engineers to deliver an alpha version of a full stack utility installation tracking application using Next.js, React, and Prisma, owning the frontend architecture and UI implementation end to end.
- Designed and shipped responsive, performant, and accessible user interfaces, working closely with product and design to translate business requirements into polished engineering solutions.
- Drove front-end technical vision for an interactive exhibit at the 2024 Paris Olympics, using React and Framer Motion to implement smooth animations and visually rich user experiences that ran reliably under heavy traffic.
- Built a proof-of-concept web application for a major pharmaceutical client using Next.js and React that integrated GenAI models into an intuitive UI, enabling scientists to explore molecule research in the browser.
- Collaborated with cross-functional stakeholders (clients, PMs, designers) to break down complex problems, scope frontend work, and ship features on time in a fast-paced consulting environment.

Software Engineer

Giant Machines (acquired by Deloitte)

May 2021 - January 2024, New York, NY

- Developed a data visualization web application for a major automotive manufacturer using React, GraphQL, Serverless, and AWS to help users track electric vehicle efficiency at scale.
- Built a React Native mobile application and web frontend for a major utility company to digitize field worker tasks previously performed on paper, improving usability and data quality.
- Created a Chrome extension using React to streamline browser workflows for a large clinical trials organization, focusing on fast, intuitive UX for power users.
- Conducted technical interviews, helped develop interview questions, and contributed to onboarding documentation and best practices, supporting a culture of excellence and high engineering standards.

Software Engineer

AstreaX

May 2017 - June 2019, Tucson, AZ

- Built frontend features and backend RESTful API services using TypeScript, Angular, HTML/CSS, and C#/.NET to support seamless user experiences across internal and external web applications.
- Partnered with the Arizona Department of Transportation to rebuild a decade-old application from the ground up, modernizing the UI, improving performance, and enhancing accessibility and maintainability.
- Implemented an internal time-logging interface that surfaced Azure DevOps project data in a single, easy-to-read timesheet, simplifying workflows for employees and managers.
- Wrote and maintained SQL scripts to create, update, and manage database records, ensuring reliable data for frontend experiences.
- Added unit tests and testing patterns across the stack to improve reliability and enable safer iteration on UI and API changes.

English Teacher

Seoul Metropolitan Office of Education

August 2019 - August 2020, Seoul, South Korea

- Planned and taught English lessons in collaboration with a Korean co-teacher for students.
- Worked in Korean and English to support learning and classroom management, strengthening cross-cultural communication and adaptability.

EDUCATION

Bachelor's in Computer Science

Minor in Illustration • University of Arizona • Tucson, AZ • 2018
